CABF SCWG summary

F2F Meeting 59 – Redmon, WAS, USA

Balloting

- Ballots
 - Under consideration
 - SCXX: SLO/Response for CRL & OCSP Responses – On hold
 - SCXX: clean-up ballot
 - Under discussion
 - SC59: Weak Key guidance
 - SC63: Make OCSP optional, require CRLs
 - SC64: Moratorium on new certificate consumers membership
 - Failed
 - None
 - Passed
 - SC62: Certificate profiles

Updates done since last F2F

- New BRs version, 2.0.0, due to application of ballot SC62 and the new profiles which changed section 7.
- Preparing and discussed a new ballot about not requiring OCSP due to privacy concerns. This is being managed under ballot SC63
- Finally presented and discussed SC59 about weak keys guidance not focusing only on Debian keys.
- Concerns discussed on certificate consumers requirements that made SC61 fail (ZT Browser application) and have had some discussions around incorporating another certificate consumer, Qikfox. This has made a new ballot SC64 for a moratorium on new certificate consumers application
- Number of open issues in GitHub reduced

Validation SC summary

- Multi-perspective domain validation
- Delegation of domain Validation
- Certificate issuance flows
- Subscriber language improvements
- Applicant and applicant representative

To be discussed

- SCWG calls
 - Doodle?
- Continue reducing GitHub open issues
 - 76 open discussions to 67
 - 9 open Pull Requests in GitHub
- Alignment of the EVGs to be RFC 3647 compliant
 - Avoid inconsistencies

That's all Folks!
