Certification Authorities in Europe

Special Challenges and concerns

13-June-2019 | Thessaloniki, Greece

Presenter: Enrico Entschew, D-TRUST, Germany

Language issues

Baseline Requirements and EV-Guidelines

- ▶ Not all descriptions in the Baseline Requirements and the EV-Guidelines are always crystal clear to non-English speakers

- ▶ You think you know what it means but it means something different.

Live-Discussions

- ▶ Sometimes for non-English native speakers loner complex discussions are hard to follow (not just Europeans)

- ▶ Loosing a part of the participants

QWAC

Qualified website certificate (QWAC)

- 40 Trust service providers issue QWAC
- QWAC is a SSL certificate
- Audit criteria are defined by ETSI but orient on EV-Guidelines

Proposal:

- Baseline Requirements policy OID
- EV validation rules,
- Technical OV or EV
