Chief Worry Architect, Cisco Cryptographic Services

June 2019

Cisco Cryptographic Services

Cryptographic Controls and Trust Verification

I know you.
You know you.
And I know you know
that I know you.

- White Goodman

Them (Non) Changes

Minimal changes since F2F 46

- Internal re-orgs
- Team personnel shifts
- New priorities for Controls team

Coming Attractions

Some quick updates

- Cisco's PSBs adjusted to make the use of the Core and Intersect bundles more ubiquitous in products and services
- AWS Root CAs 1 and 3 added to Core
- On track to remove Verisign G3 Root from Core in Q3 CY2019
- On track to shift Intersect bundle to CCADB and begin CA verifications in Q4 CY2019
