Cisco Trusted Root Store Update Fall 2018

1. Certificate Strategy (aka "What's in the box")
2. Container Strategy (aka "The box")

Certificate Strategy – The Contents of the Box

- Validation Type Differentiation (DV, OV, EV)

- Intersect Bundle Membership and outside trust stores

- Transition to CCADB

Container Strategy – Improving the Box

- Certificate Purposes
  (The "Trust Bits" problem)
- Additional formats (JKS)
