

Current situation:

- TS 102 042 remains recommended reference for compliance to CABF
 - ETSI published EN 319 411-2 that replaces TS 101 456 for qualified certificates and EN 319 411-3 that replaces TS 102 042 for public key certificates (not including SSL)
- ETSI has drafted replacement TS 102 042 in EN 319 411-1 for policies and EN 319 412-4 for profiles which has been updated to take into account public review comments
- ETSI has drafted requirements for conformity assessments EN 319 403
 - Suggestion to require that ETSI audits are carried out only by auditors accredited in accordance with Annex E of TS 102 042 in line with the direction being taken for EU audits in line with the regulation.

Now, the ETSI specifications are being revised to align with the new regulation.

-  Further details will be provided at the Beijing meeting with revised drafts available for review towards the end of the year
