

Guidelines Version 1.4 Errata

1. NameConstraints Criticality Flag

Effective 8 Jun 2012

Delete the following text from the "Subordinate CA Certificate" section of both the Baseline Requirements Appendix B and EV Guidelines Appendix B:

"All other fields and extensions **MUST** be set in accordance to RFC 5280."

AND replace it with the following:

"F. nameConstraints (optional).

If present, this extension **SHOULD** be marked critical*.

All other fields and extensions **MUST** be set in accordance to RFC 5280.

* Non-critical Name Constraints are an exception to RFC 5280 that **MAY** be used until the Name Constraints extension is supported by Application Software Suppliers whose software is used by a substantial portion of Relying Parties worldwide."
