

Proposed amendments to Baseline Requirements. New language is shown in **bold , italics, and underlined**.

1. Amend the Definitions as follows:

Valid Certificate: A Certificate that passes the validation procedure specified in RFC 5280 **(except for the limited exemption provided in Appendix B)**.

2. Amend Appendix B as follows:

Appendix B – Certificate Extensions (Normative); **Limited Exemption from Compliance with RFC 5280**

This appendix specifies the requirements for Certificate extensions for Certificates generated after the Effective Date. ***

(5) Limited Exemption from Compliance with RFC 5280

In order to comply with the requirements of Certificate Transparency, CAs may use pre-certificates and certificates that contain the same serial number and are issued from the same Subordinate CA Certificate.
