In Progress

Updates in progress
WebTrust for CA 2.2.2
  • Impact ISO 27099 was assessed
  • Some front-end discussion needs to be reworked

WebTrust for RA 1.1
  • Some front-end discussion needs to be reworked
  • Impact of ISO 27099 changes to W4CA
  • Review changes to relevant CA/B docs that are used
In Progress

Updates in progress
Reporting Templates
  • Inclusive examples
  • Qualified seal updates
  • Updated Canadian and International reports for transitional issues
  • Updating reports when issuing Network Security separately
1. Practitioner Guidance

Finalized

- Updated to reflect standards changes to March 2023
- Updated and added section on what is PKI and background
- Updating based on SOC 2 US guide changes
- Browser and delegated WebTrust members added additional material on software and IT based interrogation audit techniques for available Certificate database information
- Added Force Majeure scenario in appendix
- Added Auditor qualifications letter to browsers as appendix
- Over 175 pages in current form
- Approved for publication by Task Force Sept 19
2. Detailed Controls Reporting

- Current version has been updated for changes in BR and NS relevant criteria
- Report changes and system description modifications
- Added additional illustrative assertion and additional paragraph to audit report for service organizations
- Will NOT be primary report for public seal
- Illustrative template is now 218 pages (Wt4CA, BR and NS)
- Short form (current report) will be public facing report with seal
- Approved for publication by Task Force Sept 19
Component report template has been developed based on period of time report – (PIT does not have a section 4)

- Section 1 - Overall audit results (opinion)
- Section 2 - Management assertion
- Section 3 - Description criteria (includes system description)
- Section 4 - Detailed testing performed and results thereof
- Section 5 - Unaudited Information, such as Management comments
- Section 6 – List of CAs in scope
2. Detailed Controls Reporting
Audit report – reflecting inclusive approach

(Insert as a third paragraph when inclusive method of reporting is used for service organizations)

ABC-CA uses QRS Data Storage, Inc. [name of service organization] (service organization) to provide data centre services [describe services provided by service organization]. ABC-CA's description includes a description of QRS Data Storage, Inc. services used by ABC-CA, including the controls of QRS Data Storage, Inc. and the controls designed by ABC-CA and operated by QRS Data Storage, Inc. that are necessary, in combination with controls at ABC-CA, for ABC-CA to achieve the applicable WebTrust Criteria.
3. Impact of ISO 27099 On W4CA

Information technology
- Public key infrastructure
- Practices and policy framework
- First edition 2022/07
3. ISO Preliminary Assessment

- In this current ISO version – we now have over 400 ‘shall’ vs. the ‘should’ that were in pre-2018 21188 version
- Other changes to be addressed
  - New criteria
  - Changes in controls (both additions, deletion and wording changes)
  - Criteria deleted
  - Criteria changed into controls and prior controls deleted
  - References to other ISO docs
3. ISO Preliminary Assessment

- Prepared rough draft of WebTrust 3.0 using 27099
- Too many issues such as general references to inclusion of ISO 27002
- Have reached out for clarification on 27002 content
- At this point will continue to assess but unlikely to see anything before 2025
- Will continue to assess whether any changes are needed to WT4CA 2.2.2 in meantime
4. Lifecycle Reporting

• As all are aware separate reports exist for certain lifecycle events when they occur during the period.
  • Root key Generation Ceremony Report (Birth Certificate)
  • Key Protection (Provides assurance that once a key is created and up to the point it is moved into production, it was properly safeguarded)
  • Key Transportation
  • Key Migration
  • Key Destruction (Death Certificate)
5. New Reporting Issues

- Management assertion by service provider
- Additional reporting paragraph to acknowledge service provider
5. New Reporting Issues

• Effective April 1st, 2024, recommend practitioners to issue a separate Network Security report to support updated audit principles and criteria.
6. Other Projects Task Force is Working On

WebTrust for CA Supporting X9
- X9 is a standard setting organization for financial institutions and supporting organizations
- X9 has identified a long list of PKI use cases in the financial sector
- A base CP has been developed and creating a business plan to use WebTrust in the compliance requirements

WebTrust Supporting IoT Programs
- A number of smaller IoT programs require a WebTrust engagement for admission
- Evaluating other programs and the use of external service providers
WebTrust Update

CPA Canada Updates

- New WebTrust Task Force Members
- Signing Practitioner vs Quality Assurance Practitioner
