CA/Browser Forum Meeting

WebTrust for CA Update

06/11/2020

Jeff Ward & Don Sheehy
Agenda

• “WETSI”
• Impact of COVID -19
• Practitioner Guidance
• Current Status Of Updated WebTrust Documents
• Reporting Requirements and Sample Reports
• New Projects
• CPA Canada Update
“WETSI” - CONTINUING DISCUSSIONS
Recent discussions on impact of COVID-19 on audits
Continuing issues faced
Impact of COVID-19

Practitioner guidance for auditors on COVID-19

- Discussed areas that might impact auditors and CAs
- Potential for scope limitations in certain areas caused by inability to physically be onsite
- Provides examples of tools and approaches as best practices
- Provides examples of potential audit reports as separate item
Impact of COVID-19

COVID-19 Temporary WebTrust Seal

- Can be awarded in a limited circumstance
- All controls tested are ok, but scope limitation exists due to government mandated restrictions
- Good for 6 months – expectation that scope limitation will be eliminated at that point
- Seal is removed once scope once the “clean” opinion is issued, when it is determined a report will be qualified/modified, OR six months, whatever happens first
Practitioner guidance for auditors

- Task force handoff to CPA Canada in February
- In editing – delayed due to COVID-19 projects
- Version that combines US, Canada and International
- Provides examples of tools and approaches as best practices
Detailed Controls Reporting

- Field tested with some minor changes proposed to system description
- Audit reports developed, US Canada and IFAC
- Still tweaking some limitation wording
- Will NOT be primary report for public seal
- Short form (current report) will be public facing report with seal
Detailed Controls Reporting

- Component report template has been developed - A period of time report has been developed – point in time report does not have a section 4
  - Section 1- Overall audit results (opinion)
  - Section 2- Management assertion
  - Section 3- Description criteria (includes system description)
  - Section 4- Detailed testing performed and results thereof
  - Section 5 – Unaudited Information, such as Management comments
Section 1 – Audit report

Summary

• About 5 pages long for US version
• Reporting on disclosure requirements (similar to description criteria) for CA system and suitability of design and effectiveness of controls over the reporting period
• Sets out management and auditor responsibilities
• Sets out inherent limitations
• References tests of controls
• Provides opinion
• Describes the restricted use of the report (those knowledgeable regarding the subject matter)
Section 2 – Management Assertion

Summary

• Developed using WebTrust for CA and SOC 2
• Required for all engagements
• Certain components are required to be included, but management has flexibility to add other information in its assertion
Section 3 – System Description

Summary

• Information that is contained in CP/CPS will not be detailed in the System Description – rather it will have general reference

• Based on comparison of RFC 3647, SOC 2 and SOC for Cyber

• Compared draft requirements to SOC 3 reports on PKI

• Sample description has been prepared based on description criteria that were adopted from SOC 3 PKI and Cyber

• Can we get input as to level of disclosure being asked for (too sensitive, OK)
Section 4 – Audit Testing and Results

Summary

• Provides general introduction as to tests of controls and results
• Provides information as to types of testing conducted
• Details (by criteria) for all applicable WebTrust for CA and Baseline and Network Security Criteria
• Have developed sample controls for baseline +NS (already in place for WebTrust for CA)
• This section’s template is about 180 pages long
Section 5 – Unaudited Management Comments

Summary

• Expected to detail managements plan to deal with outstanding BugZilla or other issues as well as exceptions found in detailed testing
Current Status of Updated WebTrust Documents

No changes since last meeting

- WebTrust for CA 2.2.1 (effective June 1 2020)
- WebTrust for Extended Validation vs 1.7.1 (effective June 1 2020)
- WebTrust Baseline + NS vs 2.5 (effective June 1 2020)
- WebTrust for Extended Validation Code Signing vs 1.4.1
- WebTrust for Publicly Trusted Code Signing vs 1.01
- WebTrust for Registration Authorities vs. 1.0

Next round of updates to take place in September/October 2020 (unless needed earlier)
Reporting Requirements and Sample Reports

- Search on cpacanada/webtrust for link to CPA Canada materials
- Will be updating reports based on changes made with COVID reports
WebTrust Reports Available – Full Lifecycle

- Rootkey Generation Ceremony Report (Birth Certificate)
- Key Protection (Provides assurance that once a key is created and up to the point it is moved into production, it was properly safeguarded)
- Point In Time (As of date for testing the design and implementation of controls)
- Period of Time (Same as Point in Time, but also tests transactions over a period between 2-12 months to ensure controls are operating effectively)
- Key Transportation, Migration & Destruction
Other WebTrust Program Components

Last Updated: 30-June-19

Footnotes

2 Microsoft accepts an 'equivalent' audit for Government CAs in lieu of a WebTrust audit, with certain restrictions. For more information, refer to http://aka.ms/auditreqs.
3 Microsoft publishes specific technical requirements for Roots and certificates that are part of its root programme. Refer http://aka.ms/auditreqs for the most up to date version of the technical requirements.
4 Mozilla does not currently make a distinction between Commercial and Government CAs. Therefore, the requirements for Commercial CAs apply equally to a Government CA if part of the Mozilla Root Programme.
5 Includes special reporting requirements for the Federal PKI
6 Specific CP and CPS disclosures required; must map to CP of Federal Bridge
7 RKGC refers to audit reports to be issued in conjunction with a WebTrust Auditor’s witnessing of CA’s Root Key Generation Ceremony.
8 Key Protection refers to audit reports to be issued in conjunction with a WebTrust Auditor’s witnessing of the migration, transportation or destruction of a CA’s Root or Sub CA.
9 WebTrust for Registration Authorities (RA) can be performed by any entity that performs outsourced RA activities. This report may also be required as part of the contractual obligations by the CA, or by an oversight body such as the CA / Browser Forum.
New projects

- Use of third party auditors in WebTrust engagements
  - Subservice organizations
  - External RAs
- Reporting changes
  - Service locations and other minor changes
  - Review of ongoing reports in view of standards updates
Enhancement of CPA Canada Processes

More detailed application and process considerations for auditors, including international –

- Separation of practitioner enrollment application from trademark agreement sets stage for process automation
Enhancement of CPA Canada Processes

Seal management:
• New Seal Deployment document is under development
• Improved rigor on expired seals – new seal expiration document under development

Collaboration with Browsers:
• CPA Canada and browsers are working together to establish an automated process to feed seal and audit report IDs to browsers
• CPA Canada will notify browsers in the event a seal expires or is revoked.

Current Standing of Licensed Practitioners:
• CPA Canada’s website lists all licensed practitioners
• Provides information on their status (good standing, revocation, suspension)
• Does not provide history of the practitioners’ licensure

Reporter Structure/Roles

- Gord Beal – WebTrust falls into Guidance and Support activities of CPA Canada
- Janet Treasure – Seal system and licensing responsibility
- Bryan Walker – Licensing advisor
- Don Sheehy - Task Force and CABF liaison
- Jeff Ward - Chair of the WebTrust Task Force and primary contact
- All Task Force members provide WebTrust services to clients
- Volunteers are supported by additional technical associates and CPA Canada liaison but report to CPA Canada
Thank you.
